A strong believer in collaborative partnerships, David adopts a transdisciplinary approach to the implementation of research and practice for marginalised, disadvantaged and vulnerable (underserved) patient populations.

SKILLSET:

• Evaluation
• Policy Analysis
• Evidence-based Clinical Practice
• Quality Improvement
• Workforce Development
• Systematic, scoping, narrative, integrative, systematised, rapid reviews with meta-analysis, meta-cost, meta-aggregation, meta-ethnography
• Linked and big data
• Qualitative research methods (descriptive, grounded theory, phenomenology, participatory action research, case study)
• Mixed methods (concurrent, sequential, embedded, case study method)
• Clinical and health service epidemiology

AREAS OF EXPERTISE:

• Health policy, Health in All Policies (HiAP)
• Health laws
• Health service and workforce planning
• Situation analysis
• Culturally and Linguistically Diverse (CALD), ethics minority, priority populations
• Diversity and inclusion
• Rural and remote
• Chronic conditions
• Social determinants of health
• Avoidable Emergency Department presentation, hospitalisation and re-admission; potentially preventable hospitalisation
• Digital and virtual health
• Co-design
• Scholarly research

SETTINGS:

• Primary and community healthcare
• Public health
• Emergency Department
• Aged care
• Youth and adolescent
• Disability
• Not-for-profit
• Cross-sector
